

SLEDS Mobile Analytics

Consumers can now view data about student progress and pathways from high school to college in an easy-to-use format. Users can select specific graduation years, high schools and districts to create customized displays of information. Users are able to choose specific demographic filters to view the report through. These filters include: gender, race, economic situation, English proficiency and educational needs.

Graduate Employment Outcomes Tool

The Graduate Employment Outcomes tool shows how many Minnesota graduates are finding Minnesota jobs, and at what wages. Users can select specific graduation years, location, institution type, award level and major to create customized displays of information of employment information for years 1 to 4 after graduation.

Getting Prepared 2014

Getting Prepared provides summary information about Minnesota public high school graduates who enrolled in developmental courses within two years of their high school graduation at Minnesota postsecondary institutions and incorporates now available information on student demographics.
